

digitization ACADEMY

powered by iDigBio

Since 2021, the Digitization Academy has offered recurring set of complimentary courses on activities that add value to biodiversity observations and specimens with a goal of making biodiversity collections even more relevant to science, society, and Life.

Short, 2-hour courses on emerging topics simply require registration.

- Introduction to Photogrammetry for Biodiversity Specimen Collectors and Curators
- Introduction to Immersive Media for Biodiversity Collections
- Content Creation for Immersive Media Focused on Biodiversity Collections

Multi-day courses involve smaller cohorts and an application process.

- Introduction to Biodiversity Specimen Digitization
- Introducción a la Digitalización de Especímenes de Biodiversidad
- Digital Imaging for Biodiversity Collections
- Public Participation in Digitization of Biodiversity Collections
December 12-16, 2024

“... a good mix of content, discussion, and self-directed learning. ... better prepared to embark on a digitization project. ... well taught and structured...”

Our Approach

Our systematic overview builds the foundation.

Your experience provides the nuance and motivation.

And an expert panel identifies the leading edge of the possible.

Free, online courses on topics related to the digitization of biodiversity data

Open to everyone from the world's biodiversity collections and research community

We love to share our experience with you and love to learn from your experience. Let's talk!
